Pratt Recycling

Pratt Recycling

State of the Art Facilities

PHASE ONE, TWO AND THREE STATION PLATFORM AND STATION CONCOURSE COMPOSITE PLAN ①

Paper Mills: Three (Soon to be Four) 100% Recycled Containerboard Mills

Paper Mills

- Each Mill Consumes 1300 tons per day of recovered fiber (Mixed Paper and Old Corrugated Containers)
- 100 tons per day of rejects from the papermaking process is consumed in our Clean Energy plant.

Waste to Clean Energy Gasifier

Waste to Clean Energy Gasifier

- We consume over 800 tons per day of scrap wood and non-recyclable products to power our energy plant
- The plant produces 100% of the steam and 40% of the electricity used at our 100% recycled paper mill in Conyers

Pratt Converting

- **10 Corrugators**
 - Including world's largest in Valparaiso, IN
- **24 Sheet Plants**
- **Pratt Displays**
- **Pratt Specialties**
